

AVOCET® TANK-MIX COMPATIBILITY in Winter Wheat, Winter Rye and Triticale

PLEASE ENSURE YOU READ THE NOTES SECTION
This version supersedes all previous editions

Normal = Physically Compatible (Italics in brackets) = Sprayable with Continuous Agitation Red on Blue = PHYSICALLY INCOMPATIBLE RED ON BLUE = CROP INJURY
BOLD CAPITALS = Physically & Biologically Compatible (BOLD ITALICS IN BRACKETS) = Biologically compatible - maintain constant agitation

Herbicides

INSECTICIDES PLUS TRACE ELEMENTS							
Hallmark Zeon + Max-phi Manganese		(Karate 2.5 WG + FMC Brock)					

This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk. **Important Note:** Do not use any tank-mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank-mix restrictions apply. Larger, more complicated mixes, unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Technical Hotline on 0800 689 8899. Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Spray able with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk. Corteva Agriscience

Avocet should always be used with an approved adjuvant.

Topik is supported in mix with Avocet up to the end of February.

Ø Residual herbicides can be used in mixture or short sequence with Avocet, while conditions are favourable for both products to work and weeds are small and actively growing. However, once soil moisture declines to reduce residual activity then a **4 week** interval between the residual herbicide and an application of Avocet is recommended to maximise grass weed control and the tank-mix is no longer supported.

* Do not exceed maximum total dose of florasulam within growing season

† Corvea Agriscience only support Avocet in a 2-way tank mix with half rate chlormequat due to crop safety issues. An intervals of at least **7 days** must be regarded before applying a higher rate of chlormequat or any other PGR.

Do not mix Avocet With OPS, MCPA and Dicamba

For products containing MCPA or Dicamba respect a 14 day interval between them and Avocet.

Do not harrow or roll within 7 days before or after an application of Avocet.

Updates

Products Removed - Absolute, Ally Express, Aria, Bullion, Ductis SX, Exceed SX, Excalibur,, GEX 353, Headland Surefire Gold, Image, Lexus SX, Oklar SX, Oriel SX, Oxytril CM, Primus 25EC, Quantum SX, Staka SX, Triad, Acanto, Acanto Prima, Centaur, Demeo, Ennobe, Excelsior, Flamenco, Landmark, Menara, Olympus SC, Orka, Poraz, Torch, Torch Extra, Dimethoate

26th November 2019 - added Lantern, Tower

22nd January 2020 - changed Toppel 10 to Permasect 500 EC; 28th January 2021 - removal of withdrawn products; 1st March 2021 - addition of Iodus; 22nd March 2021 - addition of Calfitte Extra, Firefly, Impact, Multiple Pro, Sakura and Terrasorb Foliar Extra, removal of multi-way mixes with Defy; 23rd March - addition of Biopower, Monkey and Orius P; 24th March 2021 - addition of Nelson; 9th March 2022 - removal of withdrawn products, addition of Spryte Aqua CF; 14th November 2022 - Support level for Toledo and Ulysses products changed

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
